### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

This action is responsive to Applicant's amendment filed on 10/27/2004.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 21-22 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Kato et al [USPAT 6,487,353].

Kato et al disclose a dispersion-shifted optical fiber having a ratio of a dispersion to a dispersion slope being positive [fig. 5A, column 3, lines 36-61], a positive dispersion of about 17 ps/nm/km at 1550 nm [fig. 5A], an effective core area of not less than 90  $\mu\text{m}^2$  [greater than 70  $\mu\text{m}^2$ , fig. 15, embodiment 9]. Kato et al teach that the bending loss at a diameter of 32 mm is 0.5 dB/turn or less and do not teach that the

bending loss of 20 dB/m or less at a bending diameter of 20 mm. Since Kato et al show all the claimed structural limitations, it is clear that Kato et al inherently show the bending loss of 20 dB/m or less at a bending diameter of 20 mm.

***Allowable Subject Matter***

Claims 19-20, and 23-24 are allowed.

***Conclusion***

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
